

ROCKS AND MINERALS: 15 OCTOBER 2020. Roger Leech

Roger Leech has kindly offered to give his talk on Rocks and Minerals, originally scheduled for April this year, on **THURSDAY, 15 OCTOBER AT 2.15 PM, BY ZOOM. 2020**

With a father who was an engineer, Roger's early family experiences in Africa and elsewhere sparked his interest in rocks and minerals. His own career was as a scientist, initially focusing on micro-biology, but he has always maintained a serious fascination for geology and he has a most extensive collection and knowledge of a wide range of rocks, minerals and mining. Living in our local area has enabled Roger to develop his interest further. This promises to be an excellent, lively and well-illustrated talk with an exploration of rocks and minerals both above and below ground.

There is usually a monthly meeting every month of the year except July and August. These meetings take place at the Penrith Playhouse from 2.15 pm. There are also occasional study days on Saturdays at St. Andrew's parish rooms. In the current circumstances of Covid-19 these meetings have been suspended until further notice.
